

Dear Commissioners:

Don't prevent states from fixing my cell phone problems. I am writing to oppose CG Docket No. 04-208 and WT Docket No. 05-194, which will unjustly take away the authority of states to tackle problems with cell phone service, including abusive cancellation penalties. Worse, the proposal will put in place a weak set of cell phone company-endorsed rules that offer no improvements in service or enforcement.

It's time to adopt policies that force cell phone companies to improve the level of service they provide to consumers. Is not the FCC suppose to protect the consumer from the big corporations? It seems those in the FCC want to protect the corporations from the consumer that has got to stop! Americans in general will not tolerate this crap much longer it is time we the consumers either stop buying their products or we stop voting for politicians who prove not to have our best interests at heart. Better yet let's do both, boycott corporations and vote only for those politicians who protect the consumers from the corporations!

Although CG Docket No. 04-208 purports to address consumer frustration with confusing cell phone bills, hidden fees and misleading advertising, the proposal does little for consumers. In the name of helping us, the agency is proposing to block states from passing their own pro-consumer laws. As bad, WT Docket No. 05-194 would bar state courts from enforcing state law when it comes to unfair and abusive cell phone contracts. That's going too far.

States are responding to consumer complaints. Don't stop them! And don't give in to adopting weak, industry-drafted rules in their place. The FCC should stand up to the cell phone industry, and respect states rights and strong consumer protections.

Sincerely,  
Lola Luce
